APP CATEGORY **Entertainment / Media & Video**	BILLING / ADS **Free Player / No Ads / No Purchases**
REMOTE CONTROLLER **Magic Remote & General Remote**	PAIRING PORTAL **https://pairiptv.ozturk.app**

2. Remote Controller Key Mapping Table

KEY / INPUT	DASHBOARD & CATALOG	FULLSCREEN VIDEO PLAYER
Arrow Up / Down	Navigate channel rows and vertical lists	Switch previous / next channel
Arrow Left / Right	Switch tabs (Live, Movies, Series, Settings)	Seek rewind / fast-forward (VOD)
OK / Enter Key	Select channel, open playback, confirm	Toggle Player OSD toolbar
Back / Return	Return to top navigation / Exit application	Close video player, return to catalog
Magic Remote Pointer	Hover, point, click channels, wheel scroll	Click OSD buttons, Audio, Subtitles, PIP

3. Test Credentials & Prerequisites for QA

Zero Login / Pre-Loaded Demo Content

No username, password or voucher code is required. The application comes pre-loaded with public streaming channels for instant verification.

Cloud Pairing & Synchronization Verification

Testers can test cloud pairing by opening https://pairiptv.ozturk.app on PC/mobile and submitting the 6-character code shown on the TV.

Key UX Scenarios & Visual Flows

Scenarios 1, 2 & 3: Startup, Catalog & Video Playback

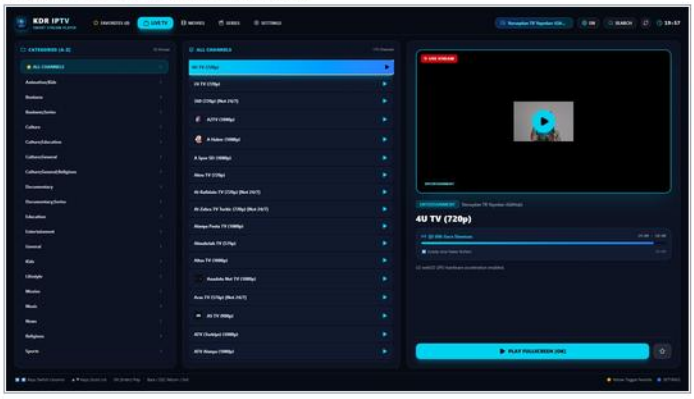

Scenario 1: App Launch & Splash Screen

1. Launch com.kdr.iptv from the webOS Home Launcher.
2. The branded splash screen displays smoothly, initializing storage & local cache.

Expected: Application reaches Dashboard in under 2 seconds without flickering.

Scenario 2: Main Dashboard & Channel Catalog

1. Use Remote D-Pad or Magic Remote pointer to browse Live TV, Movies, Series.
2. Focus updates instantly with cyan glow; Electronic Program Guide (EPG) displays current show.

Scenario 3: Video Player & On-Screen Display (OSD)

1. Press OK/Enter on any channel to launch fullscreen player with native HLS streaming.
2. Press OK/Enter during playback to reveal OSD (Audio track, Subtitles, PIP multi-screen, Aspect ratio).
3. Press Back button to close playback and smoothly return to the channel catalog.

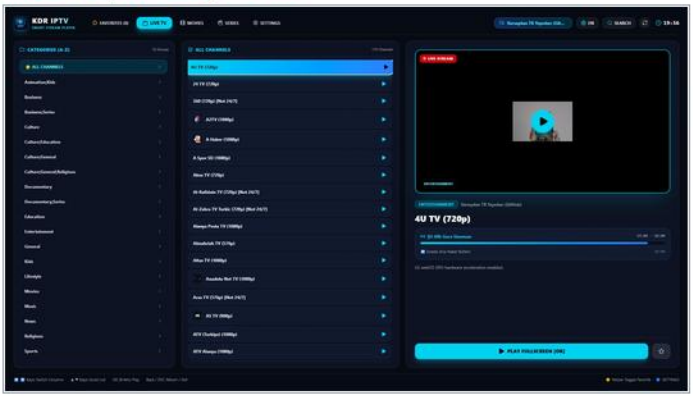

Advanced Features & Settings

Scenarios 4, 5 & 6: Cloud Pairing, PIP & Compliance

Scenario 4: Cloud Pairing & Remote Playlist Management

1. On the TV, navigate to 'Playlists' / 'Pair Device' modal. A 6-digit pairing code is presented.
2. Open https://pairiptv.ozturk.app on smartphone or browser, enter code, and submit an M3U playlist.

Expected: TV instantly receives the playlist via WebSocket and updates catalog in real-time.

Scenario 5: Multi-Screen PIP (Picture-in-Picture)

1. While watching live video, open Player OSD and click the PIP icon.
2. Secondary channel streams smoothly inside the thumbnail overlay without interrupting main audio.

Scenario 6: Settings & Privacy Policy Compliance

1. In Settings tab, inspect App Version (1.0.4) and Privacy Policy link.
2. Privacy page is publicly hosted and accessible at: https://pairiptv.ozturk.app/privacy

> **QA Compliance & Safety Confirmation**
> KDR IPTV is an open player shell. It contains zero copyrighted streams, zero adult material, zero advertisements, and complies 100% with LG Seller Lounge App Submission Guidelines.
